 NanaWall Aluminum Framed Folding System SL60
 Designer: Intrawest

ENHANCE THE GUEST EXPERIENCE

A NanaWall opening glass wall enables the hotelier to create large inviting entrances in the lobby area and throughout the hotel, ensuring a memorable first and lasting impression. Incorporate beautiful views, hotel landscaping, natural daylight and fresh air into the registration, dining, and guest room areas.

- Fully opened exterior systems allow connection to the outdoors.
- Utilize interior partitions for private functions such as ceremonies, receptions, and gaming.
- Easily expand a restaurant, bar, or lounge area to an exterior patio, balcony, or terrace.
- Create large, open entrances to accommodate guest traffic flow.
- Dampen sound transmission for optimal acoustical performance when systems are closed.

COMMERCIAL MARKETPLACE TESTED

NanaWall opening glass walls stand up to the daily commercial grind. Personnel easily open and close the NanaWall with single-handed operation.

- Independent testing results are available for air, water, forced entry and impact, thermal performance, and structural load.
- STC ratings for sound attenuation for select systems.
- Swing panels are tested for 500,000 cycles and meet industry operational standards (AAMA920) for the SL45 and SL70 systems.
- Multipoint locking entry doors as well as extra-long, tamper-resistant dual point locking rods between panels ensures each system meets or exceeds most forced entry testing for commercial grade door panels.
- Built-in adjustment and compensation points ensure continued ease of operation if building settling occurs.

THE ONE AND ONLY NANAWALL

NanaWall redefined the category of opening glass wall systems. During our 30-plus years in business, we have earned the trust of architects, builders, design professionals, and homeowners as a solutions provider for re-imagining how buildings, people, and the elements interact. By combining precision engineering and outstanding design options across more than 20 unique systems, we advance design possibilities beyond the conventional for almost any space.
